Middle of the Road

by Trick

Solidarity is our goal here, so stick to the middle of the road—no extremism! The rows of this grid have two or more answers clued in order, while columns have one answer each. Certain grid squares will need to be left blank; these squares can occur anywhere in an answer. Any square not used by a row will also not be used by the crossing column. Additionally, some entries in row G contain hidden letters not used in a column answer. Hidden letters must be placed *between* squares, on one of the grid's vertical lines. Answer lengths are not shown—sorry! When you're finished, follow the central cluster of letters to a new starting point, where you'll be able to fill in more of the grid's blank squares. Your additions will reveal a decidedly moderate position on the issues.
